Registration, Evaluation, Authorisation of Chemicals - REACH

We at ITW Performance Polymers Europe are aware of and committed to complying with regulation EC1907/2006. We have dedicated the appropriate resources that are necessary to ensure compliance with this new legislation.

We have pre-registered affected substances and are working to fulfil our obligations under the REACH regulations through participation in the REACH registration process. We are in communication with our customers and suppliers to ensure continued supply of our products.

Currently, we do not anticipate the exclusion of our products due to the requirements of REACH.
